

DIMEX™ Electrically Conductive Matting

Drains off static electricity, preventing damage to vulnerable equipment.

Available in $\frac{3}{32}$ " diamond plate or $\frac{3}{32}$ " smooth surfaces.

Tested to ESD-S7.1 1994 for surface resistivity.

Surface resistivity 10^6 OHMS.

DIAMOND PLATE

A conductive runner with high profile diamond embossed top surface allowing traction from any direction. The surface sweeps easily and will accommodate rolling carts.

SMOOTH

This conductive runner matting is smooth on the top and the bottom.
